I apologize for not getting back to you sooner. Sweet's Pond has gone through Phase III release and the land owner is now responsible for everything relative to that impoundment.

I forwarded your E-mail to Bill Bates @ DWR (beaver issue ?) and Marc Stillson at the State Engineers Office and did not get a response from either.

I took pictures of the pond on May 3, and the water level looked normal to me. They are attached.

Also, I spoke with Dan Guy, and he didn't know the status of the pond ownership now. If I hear of anything more, I will keep you informed. If there is an issue, no one seems concerned at this point.
